1 (Smartphone)

Search for a destination

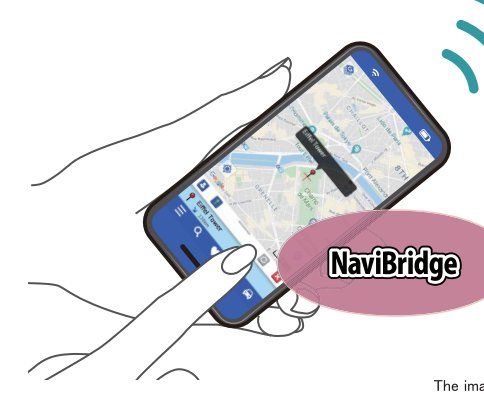

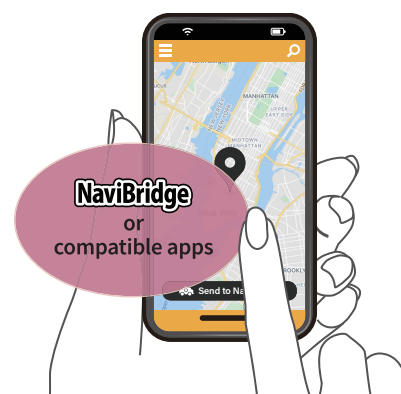

2 (Smartphone)

Send the destination to  
a GPS navigation system

3 (GPS navigation)

Start navigating and  
enjoy your drive!!

The image illustrates a GPS navigation system supporting Bluetooth connection.  
The connection method may differ depending on the type of GPS navigation system.

With the NaviBridge app, you can operate the in-vehicle GPS navigation system from a smartphone.  
The destination searched and selected using the compatible apps or websites can be easily sent to the GPS navigation system  
with one tap on your smartphone.

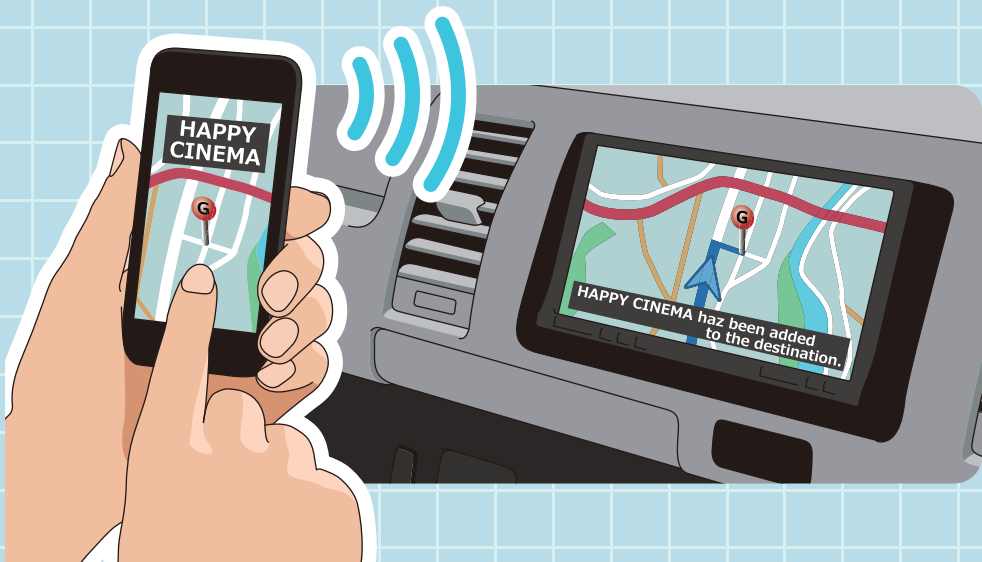

**DENSO**

# NaviBridge makes your drive so much fun !

**Use your smartphone as the GPS navigation's remote controller!**

Use your phone to search and set a destination on the GPS navigation system.

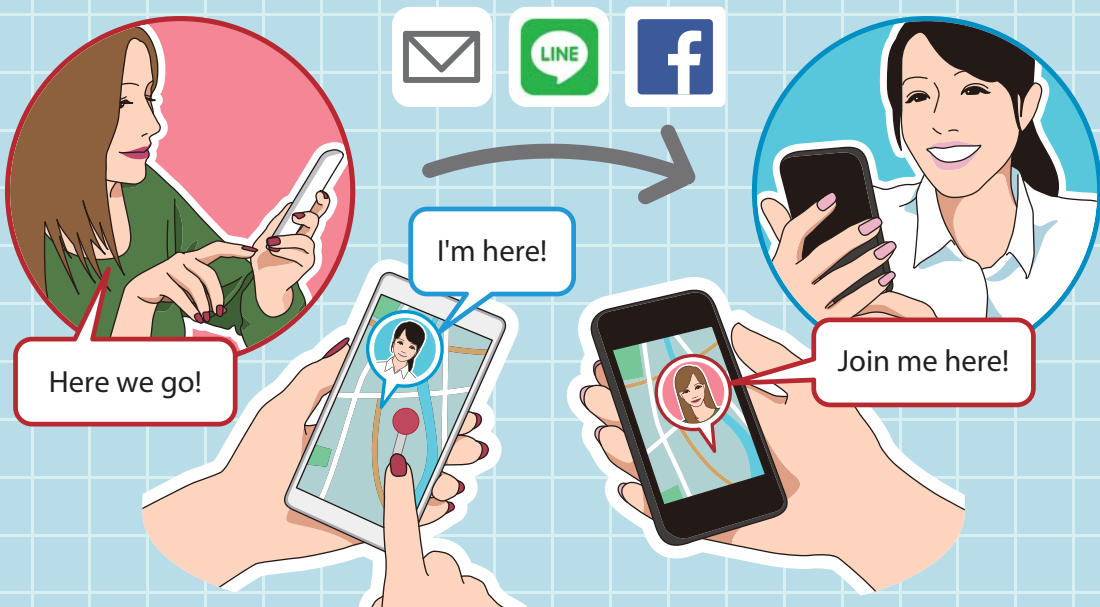

**Collect your favorite places!**

Add any places to your Bookmarks. Select and set a destination from the Bookmarks and get routed.

**Share places with your friends!**

Via e-mail and SNS, share your locations and destinations among your friends, and view it on their smartphones.

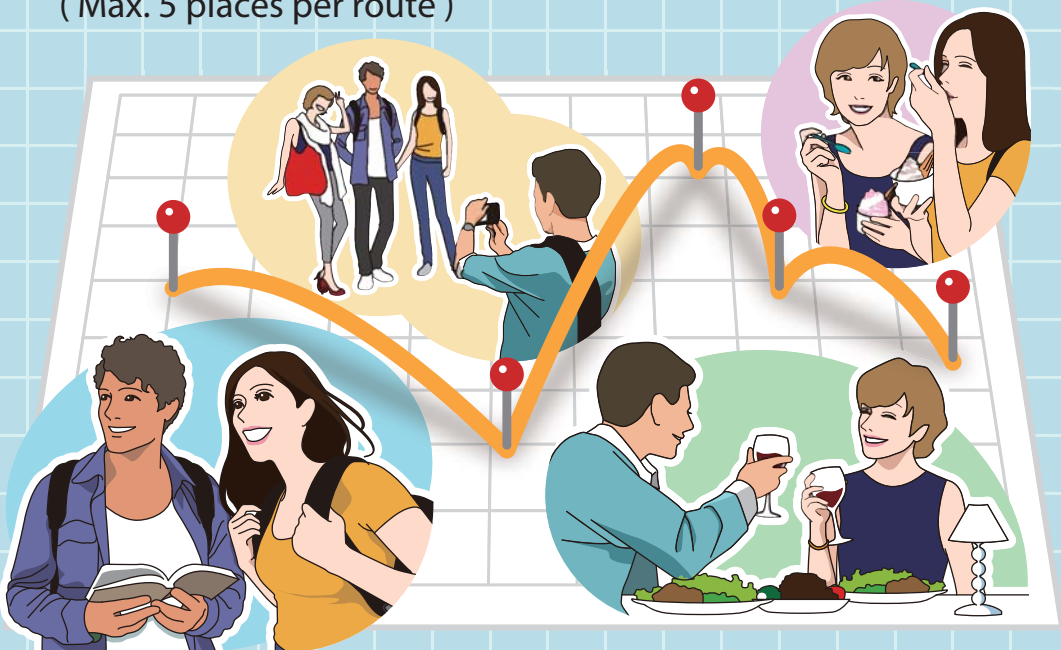

**Many apps that work with NaviBridge are available for your smartphone!**

These apps allow you to search for destinations.

**Have a nice trip!**

Create as many routes as you like with the Bookmarks.  
( Max. 5 places per route )

**Make your app work with NaviBridge using Titanium module!**

If you are using Titanium by Appcelerator, NaviBridge Module makes it easy for your app to be compatible with NaviBridge.
